Product cost (million rubles)												
Requires individual calculation	from 0,5			from 0,5	10,7	Requires individual calculation	10	4,2	Requires individual calculation	Requires individual calculation	from 0,5	3,8
Implementation period (months)												
1	from 1 to 6			from 1 to 6	6	6	6	6	12	from 1 to 6	from 3	6
Platforms												
	Digital platform "Smart city"			Integration platform	Integration platform	Industrial IoT Platform / Integration Platform	Integration platform	Integration platform	Industrial IoT Platform / Integration Platform	Industrial IoT Platform / Integration Platform	Industrial IoT Platform	Industrial IoT Platform / Integration Platform
Modules												
Analysis of the current state and selection of priority areas of digitalization	COVID	Information panel of the head of the city (ARMSitymanager)	Fire hydrants	Certification of municipal employees	Component "LowCode". Keeping registers	Pharmacy	API 2.0	Navigation module for educational opportunities	Automated traffic control system	Module "Scada IoT"	Analysis of balances	Resource accounting
Lean Smart Methodology	Automatic sending of readings from devices accounting (accounting of utilities)	Urban planning information systems (ISCGD)	Weather conditions	Interaction with personnel for HR	Component "Digital control panel for the region"	Poster and events	SEO	Automation of processes of transport companies	Module of vocational guidance and construction of individual educational trajectories	Industrial IoT gateway module	Mode analysis	Resource management
Formation of a unified conceptual apparatus and image of the future in the framework of the upcoming changes	Authorization through ESIA (State services)	Constituencies	Police stations	Road condition monitoring	Component "Production and control of tasks and assignments"	Flea market	Web portal	Weight and dimension control	Module of vocational guidance and construction of individual educational trajectories	Module "BIM" data storage and visualization	Applications	
Designing a roadmap for digitalization	Rent (space for rent)	Marketplace. Payment for services of municipal institutions	Conducting polls and polls	Municipal Service: Agreement on the redistribution of land and land use	Component "Analytical subsystem"	Safe route	Interactive panels	Monitoring compliance with traffic rules	Employment Promotion Module and building career trajectories	Business Process Designer Module	Crawler controller	
	Architecture and urban planning	Marketplace. Payment for services of sports institutions	AKP	Municipal service: provision of a land plot on which buildings, structures are located	Component "Integration Platform"	Internal chats	Content	Meteo-monitoring			Central panel	
	Automated traffic control system	Marketplace. Payment for student meals	Face recognition	Prevention of violations of the rules of improvement		Volunteers	Coupons	Modeling traffic flows				
	Cellular base stations	Medicine	Network monitoring (power monitoring)	Working with citizens' appeals through social networks		GIS Housing and Communal Services + UK	Marketplace	Monitoring the condition of the road surface				
	Immortal Regiment	Smart City mobile application (iOS)	Civil defense and emergency alert system	Formation of financial statements of subordinate organizations of DHS		Cleaning Schedule	Mobile app	Fare payment and payment control systems				
	Improvement of yard areas	Smart City mobile application (Android)	ACS (ACS MKD)			Mobile application "Active Citizen"	MSB	Transport safety				
	Interaction with personnel for HR	Public transport monitoring	ACS (ACS MKD)			GIS Objects	Navigation	Tourist road services				
	CCTV	Service vehicle monitoring	Coordination of earthworks Residents' messages			Civil defense and emergency alert	Polls	Smart stops				
	Elections	Monitoring (situation center)	Pedestrian Crossing Statistics			Planned emergency work	Offline	Public transport management				
	Guide (tourism)	Non-stationary maintenance	Counters			Weather and ecology	Partners	Parking space management				
	Urban problems	News	Telephone messages			Food basket	Advertising	Evacuation management				
	Mechanized harvesting schedule	Providing mobility	Service areas of management companies			Simple law	Advertising 2.0					
	GIS data for housing and communal services	Online car search	MSW collection points (garbage and MSW)			Additional classes	Layers					
	Roskadastr data	Heating	TTransport			Service for the visually impaired	Articles					
	Elevator dispatching	Overlapping roads	Cleaning			Sports and leisure	Tags 2.0					
	Road accident	City government plans	City lighting control			Urban content management	Excursions 2.0					
	Ordering archive video (receiving archive video from the camera)	Paid services	Municipal Property Management (KUMI)			School meals						
	Excavation		Institutions									
	Engineering networks (communications)		Environmental monitoring
